TITLE	Career Placement and Graduate Transfer Report, 1997.
INSTITUTION	Community Coll. of Rhode Island, Warwick.
PUB DATE	1998-00-00
NOTE	57p.
PUB TYPE	Reports - Research (143) -- Tests/Questionnaires (160)
EDRS PRICE	MF01/PC03 Plus Postage.
DESCRIPTORS	College Choice; *College Graduates; *College Transfer Students; Community Colleges; Full Time Students; *Graduate Surveys; Higher Education; *Job Placement; Majors (Students); *Outcomes of Education; *Salaries; Tables (Data); Two Year Colleges; Vocational Followup
IDENTIFIERS	*Community College of Rhode Island

ABSTRACT

This report provides data on career and transfer outcomes of 1997 graduates from the Community College of Rhode Island (CCRI). A brief preface explains that surveys were distributed to 1,551 graduates from 1997, with a total response rate of 84.8 percent (n=1,315). Results from the survey indicate that, with small exception, 1997 graduates are employed and/or continuing their professional studies. The statistical breakdown reveals that 86.9 percent of the 1997 graduates are employed (43.4 percent full-time), 39.5 percent are continuing their education (28.5 percent full-time), and 3.0 percent continue to seek employment. Data on graduate outcomes are presented for the following 25 programs: business administration, cardio-respiratory care, chemical technology, clinical laboratory technology, computer studies, criminal justice and legal studies, dental assistant, dental hygiene, electronics, engineering, engineering technology, fine arts, fire science, human services, liberal arts, machine design, manufacturing technology, nursing (associate degree and licensed practical), office administration, phlebotomy, physical therapist assistance, process control technology, radiography, retail management, science and technical studies. For each program, information is offered on the number of responding graduates, percentages of graduates employed or graduates employed from each, and receiving colleges, including the number of graduates enrolled by major. Appendixes provide a list of CCRI programs and concentrations, the survey instrument, graphs of placement and transfer outcomes, and a comparison of 1995, 1996, and 1997 graduates. (AS)

Community College of Rhode Island does not discriminate in admissions, services or employment on the basis of sex, race, color, religion, national origin, ancestry, sexual orientation, age or handicap.

A Message from the President

Students who are successful in completing a program of study at the Community College of Rhode Island achieve their education or career goals by transferring to a four-year college or university, obtaining employment in their chosen field or by a combination of work and continued study.

The Career Placement and Graduate Transfer Report documents the education and career activities of our graduates once they leave CCRI. The report provides information about the employment status and salary ranges of graduates who elect full-time employment as well as a listing of colleges and universities chosen by those who went on to continue their education on a full-time basis. The information is useful in advising current CCRI students, and is a valuable resource for guidance counselors in secondary schools throughout the state, and for businesses and industries that are potential employers of our graduates.

The Community College is proud of its placement and transfer record. I'm sure that you will find the information contained in this report impressive as well as useful.

Edward J. Liston

APPENDIX D Comparison of 1995, 1996 & 1997 Graduates D-1

Preface

Each year, the Community College of Rhode Island conducts a study on the employment and continuing education status of the previous year's graduates.

This year, a survey for the class of 1997 was distributed to 1551 graduates. Two mailings and a follow-up telephone survey produced a total response rate of 84.8 percent. A sample questionnaire is provided in Appendix B.

Results from the survey indicate that, with small exception, 1997 graduates are employed and/or continuing their professional studies. The statistical breakdown reveals that 86.9 percent of the 1997 graduates are employed (43.4 percent full-time), 39.5 percent are continuing their education (28.5 percent full-time) and 3.0 percent continue to seek employment. Information comparing responses of graduates from the classes of 1995, 1996 and 1997 can be found in Appendix C. .

Since the Report on Career Placement and Transfer of 1997 Graduates is based on a self-report survey, some caution in interpretation is suggested. The following information should provide further clarification of the data. Average salaries, based on a 40-hour week, are reported only for education-related employment and may show an unexpected broad range due to data collected from both graduates in entry-level positions and professionally employed graduates who attended CCRI for further professional development.

The overall results from this year's Placement and Transfer Report again validate, as did all reports since 1985, CCRI's success in preparing students for careers and for further education.

SURVEY STATISTICS FOR CLASS OF 1997

1551 GRADUATES

1315 RESPONDING 84.8%

571	Employed Full-Time	43.4%
145	Employed Full-Time/Education Part-Time	11.0%
146	Employed Part-Time	11.1%
39	Unavailable For Employment	3.0%
39	Unemployed & Searching	3.0%
93	Education Full-Time	7.1%
282	Education Full-Time/Employment Part-Time	21.4%

"CCRI pointed me in the right career direction. It's a great place to start."

Stephen T. Gentile
Certified Public Accountant

Business Administration

The Business Administration Program focuses on providing students with a solid academic background in business as well as specialized training in a variety of areas. Students receive a solid foundation in management, marketing and accounting. They also learn critical thinking, problem solving and decision-making skills. A cooperative education option offers students an opportunity to gain work experience while in school.

Cardio-Respiratory Care

A respiratory care worker is an allied health specialist employed under medical supervision in the treatment, management, control, diagnostic evaluation and care of patients with deficiencies and abnormalities associated with the cardiopulmonary systems of the body. CCRI's two-year, six semester program incorporates college classes with clinical practice. Graduates must pass a national entry-level examination. Respiratory therapy personnel are employed in hospitals, nursing facilities, clinics, doctors' offices, home care companies, rehabilitation centers and municipal organizations.

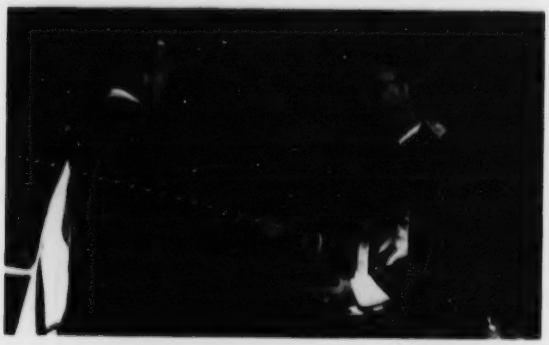
12

Chemical Technology



The Chemical Technology Program integrates experimentation, lecture and recitation materials to produce a unified presentation of analytical, inorganic, organic and industrial chemistries. It is designed for students who are more interested in the application of science than the mathematical descriptions of theoretical concepts. The program is accredited by the American Chemical Society. Graduates from the program find employment in areas ranging from aerospace and biochemistry to pollution control and zinc metallurgy.

Clinical Laboratory Technology

(formerly Medical Laboratory Technology)

Clinical laboratory technicians perform all of the routine tests in an up-to-date medical laboratory. The technician is required to know specific techniques and instruments. The CLT Program is a two-year program that includes clinical training. At the end of this experience, students are eligible to take a certification examination to become licensed by the State of Rhode Island. Graduates work in private laboratories, doctors' office laboratories, hospital labs, research, sales and commercial laboratories.

Computer Studies

CCRI offers two Associate in Science degree programs in the computer area. The Computer Programming degree program prepares the student to enter a modern programming environment. It stresses problem definition and solution design using different programming languages in the development of applications. The Microcomputing degree program prepares the student to enter a workplace that emphasizes the use of the personal computer as a stand-alone device or in a networked computer environment. This program prepares an individual to be employed in computer user support services. The college also offers one year certificate options, which emphasize technical work only, for students who already hold a Bachelor's Degree or have two years of work experience in a computer-oriented profession. The career paths of graduates have been changing in recent years; instead of working in programming positions which typically lead to systems analysts positions at banks or insurance companies, students are going to work for major companies to man the "help desk."

1997 GRADUATES OF PROGRAM: 59

1997 Graduates of Program Responding: 48 81.4%

19	Employed Full-Time	39.6%
11	Employed Full-Time/Education Part-Time	22.9%

Criminal Justice & Legal Studies

The Criminal Justice and Legal Studies Program is designed to provide students with the academic courses and specialized training required for a law enforcement career or a paralegal position. The program meets the requirements established by many police departments which mandate successful completion of 60 hours of college course work in law enforcement for consideration for employment. The Legal Studies Program prepares students to become paralegals for the legal profession and the business community.

Dental Assistant

The CCRI Dental Assisting Program is a one year program accredited by the American Dental Association's Commission on Dental Accreditation. The majority of dental assistants are employed by general dentists, providing chairside assistance. Additionally, some are employed in specialty practices such as orthodontics and oral surgery.

Electronics

The Electronics Technology Program trains individuals to be electronic repair and troubleshooting technicians. Students develop an understanding of both theoretical and practical applications of circuit design, construction and testing of systems. Graduates of the program generally enter the workforce as entry level technicians at companies such as Cherry Semiconductor, International Business Machines, Digital, Toray Industries, AT & T and Xerox.

The Engineering Program is designed to provide a firm background in basic engineering principles. Students who successfully complete the program may transfer to a four-year institution or go directly into employment as an engineering assistant. The curriculum includes a strong foundation in mathematics, the basic sciences and engineering fundamentals, as well as liberal arts courses.

Engineering Technology

CCRI has two Engineering Technology Programs. The Electronic Engineering Technology Program educates students as technicians in the design, development and testing of engineering models and systems. Graduates of this program pursue careers as engineering associates, engineering aides in research and development, field engineers, sales engineers, engineering technicians, technical writers or assistant production managers in the electronics industry. Due to the increasing complexity of electrical and electronic equipment, many students decide to expand their knowledge by pursuing a four-year degree in engineering technology. The Mechanical Engineering Technology Program trains students to convert engineering theory into working plans in order to solve real world problems. The students study traditional engineering subjects such as physics, math, statics, materials and mechanisms as well as taking courses in the areas of robotics, tool design, quality control, CAD, production planning and cost estimating. Graduates are qualified to seek employment in the design as well as the manufacturing or industrial engineering areas.

CCRI offers the Associate in Fine Arts degree in Art, Jazz Studies, Music and Theatre. These programs serve both students transferring to a four-year college or professional school and students who wish to pursue a career. They provide hands-on experience in the first two years of higher education, a strong foundation in the humanities, exposure to interdisciplinary study. CCRI offers the only Jazz Studies program in Rhode Island and the only theatre program which offers jazz, ballet and modern dance. Students in the theatre program develop skills and creativity in the areas of acting, musical theatre, technical theatre and communications. Visual arts students focus on ceramics, interior and graphic design, and photography. Music students may concentrate on performance, teaching, communications, composition or the music business.

Fire Science

The Fire Science programs are designed for individuals who wish to enter the fire fighting profession. It provides leadership skills, technical knowledge and Emergency Medical Technician qualifications needed to be successful in the fire community. The curriculum strengthens the knowledge base of the current professional fire fighter and augments expertise practiced in the community.

Human Services

Human service workers perform in a variety of educational and therapeutic settings with individuals, groups and families. Students receive an education which combines competency-based training specific to each education and social service concentration with supervised field work internships. Graduates may continue their education or enter the human service delivery system as child care and special needs professionals, social work case aides, assistant teachers, residential care providers and substance abuse counselors.

"I saved money and built a solid academic foundation by beginning my education at CCRI. It's a choice I'll never regret."

Jenn Chappelle
Arizona State University

Liberal Arts

The Liberal Arts degree program is designed for students intending to transfer to baccalaureate degree programs following graduation from CCRI. It requires coursework in English composition including research writing, mathematics and laboratory sciences, history and the social sciences, and the fine arts and languages. Graduates transfer most often to Rhode Island College and the University of Rhode Island, although CCRI also has agreements with nearly 50 baccalaureate colleges and universities throughout New England. These agreements guarantee admission and junior year status to CCRI liberal arts graduates with satisfactory grades. These colleges include Bryant College, Salve Regina University, Roger Williams University, Boston University, U Mass/Dartmouth, Stonehill College, Worcester State College and Suffolk University.

Machine Design

The Machine Design Program offers students practical skills in the detailing and design of mechanical components. Students receive instruction on both traditional drafting equipment and computer-aided drafting and design equipment. Graduates of the program generally accept positions as beginning detailers, advancing to designers. They may also transfer to Industrial Technology Programs at Northeastern University and Roger Williams University.

Manufacturing Technology

(formerly Machine Processes)

Students in the Manufacturing Technology Program receive training in both manual skills and theory. Basic competency is achieved in working with common machine tools and accessories, inspection techniques, shop math, blueprint reading skills, principles of computer numerical control machine tools, basic tool and die making and EDM operations. Careers of graduates include tool and die maker, machinist, quality control personnel, machine operator, production manager, machine tool repair and machine tool sales.

Nursing (Licensed Practical)

The Practical Nurse Program is part of the articulated nursing program. Once accepted into the program, students can complete the requirements for graduation within eleven months and are eligible for the licensing examination for practical nursing. Graduates of this program are quickly assimilated into the health care field and work in a variety of health care settings. As a graduate of this program, the licensed practical nurse may return within five years and complete the requirements necessary to receive an associate degree in science for registered nurse in one year.

The Office Administration programs are designed to emphasize a variety of computer tasks created by new technologies as well as traditional office tasks. With the shift of work responsibility from middle management, the role of the office professional has become critical. The department's programs have been developed to address changing workplace requirements. Program options include administrative assistant/secretary, legal administrative assistant/secretary and medical administrative assistant/secretary. Cooperative education experience is available to students.

A phlebotomist is an individual who obtains blood samples for clinical laboratory testing. The program at CCRI consists of two semesters, including 160 hours of clinical training at an affiliated site (hospital, private lab or clinic). Students must pass a national certification examination. Phlebotomists are employed in private laboratories, doctors' office laboratories, hospital labs, clinics and emergency rooms.

Physical Therapist Assistant

The physical therapist assistant works under the supervision of the physical therapist to treat patients with physical disabilities resulting from disease, injury or other bodily conditions. Their duties include assisting the therapist in implementing treatment programs according to the plan of care established by the physical therapist, training patients in exercises and activities of daily living, conducting treatments using special equipment, administering modalities, and reporting patient responses to the physical therapist. The program is a two year program which includes 16 weeks of clinical experience. Passage of a licensure examination is required. Physical therapist assistants work in hospitals, clinics, rehabilitation facilities, long-term care facilities, extended care facilities, school camps and in patients' homes.

Process Control Technology

(formerly Instrumentation Technology)

The Process Control Technology Program is a study of the electronic, pneumatic or hydraulic instruments used in the field of process control. Students are trained to calibrate, maintain, repair and operate instruments used in process control systems such as power generation, chemical, pulp and paper, water and wastewater, and food and beverage systems. Graduates obtain jobs as process engineers/technicians, instrument and control technicians, and test and evaluator technicians. This program is one of only two in New England.

Radiography

A radiographer is a person who uses x-radiation, a knowledge of anatomy, and imaging principles to aid physicians in the diagnosis of disease, in monitoring patient progress and in controlled screenings to help prevent disease. A radiographer works in hospitals, clinics, doctors' offices, and private emergency rooms. The profession offers numerous opportunities for advancement, including computed tomography and special procedures. With one year of additional education, there are opportunities in medical ultrasonography, nuclear medicine and radiation therapy.

Retail Management

The Retail Management Program is designed to prepare students for careers in mass merchandising or fashion merchandising. A major component of the program is the cooperative work experience in which students are employed in retail establishments throughout the state. Graduates obtain employment in department stores, specialty shops, chains, catalog showrooms, and off-price stores. Within each type of store there are career opportunities in merchandising, buying, management, sales promotion, human resources, loss prevention, real estate, operations, distribution, finance and accounting.

The Associate in Science Degree program is divided into two tracks. Track A is intended for those who expect to go into the fields of forestry, home economics, mortuary science, nutrition, dietician, optometry, physical education or plant science. Track B is for those who wish to enter astronomy, biochemistry, biology, biophysics, chemistry, geochemistry, geology, geophysics, marine biology, meteorology, oceanography, pharmacy, physics, pre-medical, pre-dental or pre-veterinarian studies. Both tracks require proficiency in English, foreign languages, mathematics, as well as the sciences. This is primarily a transfer program.

CLASS OF 1997 CAREER PLACEMENT SURVEY

1. Which statement **BEST** describes your present situation? (Check one)

_____Employed Full-Time

_____Employed Full-Time & Education Part-Time

_____Employed Part-Time

_____Unavailable for Employment

_____Unemployed and searching for a job

_____Education Full-Time

_____Education Full-Time & Employed Part-Time

PLEASE ANSWER ONLY THOSE QUESTIONS THAT APPLY (Please Print)

2. If working, employed by _____
Current position _____ How long in this position? _____

3. Is this position related to your program of study at CCRI? __YES __NO

4. Do you think CCRI effectively prepared you for this position? __YES __NO

5. Were you in this position before you began your studies at CCRI? __YES __NO

6. Salary: Hourly: _____ Weekly: _____ Yearly: _____

7. How many hours a week do your work? _____

8. Is this position in line with your career goals? __YES __NO

9. If you are continuing your education **FULL-TIME,** what school are you attending and what is your major?

_____

_____

10. Do you think CCRI effectively prepared you for your present studies? __YES __NO

OPTIONAL COMMENTS:
On the back of this survey, please add your observations on CCRI's effectiveness as an educational institution (include strengths and/or areas needing improvement).
